Code 3 Introduces Emergency Lighting for the 2015 Charger

Code 3 Introduces Emergency Lighting for the 2015 Charger

Code 3®, Inc. introduces a complete set of lights and sirens custom fit for the 2015 Dodge Charger. From the license plate to the front grille, to the lightbar, and finally to rear lights, Code 3 has you covered from all angles!

Code 3 recently released the SuperVisor Flex, an interior windshield light, which is available in MultiColor (18-up) and single color (9-up) using the latest Torus LED technology. The Flex lighthoods are situated, so they shine straight ahead while the LEDs in each lighthood are designed to spread light, so they do not require aiming. This interior windshield light along with the WingMan in the back deck are ideal for the 2015 Charger.

Additional products for crucial lighting are the grille area, side mirror, and the license plates. As always, Code 3 provides deck, dash, and exterior lighting, plus Hide-A-Blasts for rear taillights. All provide optimal lighting for straight-on and off-angle performance.

For a complete listing of the new 2015 Charger lights and siren, visit code3esg.com or call Code 3 Customer Service at (314) 426-2700.
